

Buses Affected: All buses with Blue Bird® Variable Geometry Turbo (VGT) engine brakes.

Notice: The “Cruise Control” switch is in the ON position and will not allow the engine brake to work. By being in the ON position, this basically nullifies the VGT feature, and the engine brake is not allowed to operate.

Correction: Turn the “Cruise Control” to the OFF position. Take time to educate your Drivers and Technicians alike as to the proper operation of these items.
